### SUMMARY

Passionate MERN Stack Developer skilled in building responsive web apps using MongoDB, Express.js, React.js, and Node.js. Proficient in HTML5, CSS3, JavaScript (ES6), Tailwind CSS, and Bootstrap. Strong understanding of full-stack development, REST APIs, and database integration. Quick learner, eager to grow and contribute to your company's success through innovative and reliable web solutions.

### PROJECT

#### E-Commerce Website (MERN Stack)

**Frontend** :- Built with React.js, styled using **Tailwind CSS** and **shadcn UI**, managed state with **Redux Toolkit**.

**Icons** :- Used **Lucide** and **Devicons** for clean, modern icon integration.

**Authentication** :- Used **bcrypt.js** for password hashing and JWT for secure login.

**Media Uploads** :- Handled product image uploads using **Multer** and **Cloudinary**.

**Payments** :- Integrated **PayPal SDK** for secure online payments.

#### REAL TIME CHAT APPLICATION

**Frontend** :- Built using React.js, styled with **TailwindCSS** and **Daisy UI** for a responsive and intuitive user interface.

**Real-Time Messaging** :- Implemented **Socket.io (client & server)** to enable live, bidirectional chat functionality between users.

**Backend** :- Developed RESTful APIs using **Node.js** and **Express.js** to manage users, messages, and conversations.

**Authentication** :- Secured routes and user sessions using **JWT (JSON Web Tokens)** for token-based authentication.

**Performance & UX** :- Ensured smooth user experience with real-time updates, typing indicators, and responsive design across devices.
